

Oil-Treated Stones

- Saturated in an oil solution to minimize loading
- Contains sharp white aluminum oxide abrasive that fractures into sharp pieces during polishing, to extend the life of the abrasive grit
- Popular general-purpose polishing stone often used for light EDM scale removal and machined surfaces
- Recommended use on all tool steels of all hardness such as A2, D2, M2, S7, and H13

OIL-TREATED ATTRIBUTES

Hardness: Medium Hard

Breakdown Ratio: Moderate

Wet or Dry: Wet & Limited Dry

Abrasive Grain: White Aluminum Oxide
